Sage Intacct Cloud Accounting Software for FQHCs

The #1 cloud accounting solution helping nonprofits strengthen stewardship, build influence, grow funding, and achieve mission success.

We're passionate about building nonprofit accounting software that helps you navigate the complexity and demands of nonprofit financial management. Federally Qualified Health Centers (FQHC) face unique challenges: from compliance reporting to generating outcome metrics and providing real-time visibility—we want you to spend less time on administrative tasks and more time on what really matters—advancing your mission.

Built for nonprofits

As your organization grows, manual processes drain your productivity and it's difficult to analyze your growing range of data. While you're managing multiple donors and funding sources, increased demand for services, and changing regulatory requirements, we've built our accounting software with you in mind. Sage Intacct FQHC customers have experienced efficiency gains up to 60% and dedicate more time to strategic work.

We provide intuitive core fund accounting with a dimensional general ledger and accounts payable automation, comprehensive grant tracking and billing, automated revenue recognition, easy-to-use reporting and dashboards, and a HIPAA-compliant advanced audit trail.

Real-time visibility and insights

FQHCs need visibility into financial and operational metrics to make more informed decisions about programs, fundraising, staffing, and more. The Sage Intacct real-time reporting allows you to measure performance for financial, operational, and outcome metrics. Every transaction in the system is tagged with dimensions, so finance teams can sort, view, filter, and report on the specific information they need.
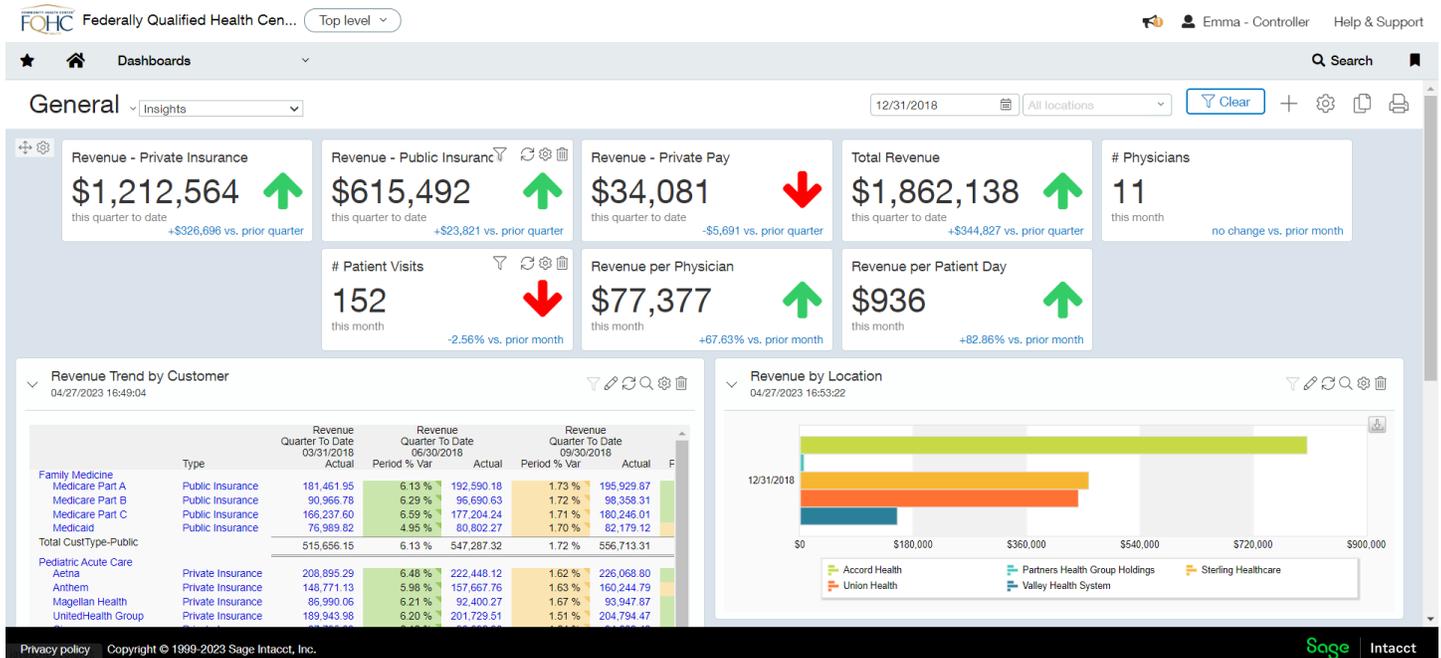

True cloud technology with open API

As an innovator in the cloud space, Sage Intacct has honed a true cloud model. Sage Intacct was built to deliver multi-tenant financial management, on a platform purpose-built for finance. This allows all users to be on the same version, without complicated and expensive upgrades. Our open API lets you connect to existing or future systems. This means you can leverage key data from electronic medical records like EMR Connect for Sage Intacct, patient billing, patient management, payroll, budgeting, and other systems to track metrics that are central to your organization's operations and programs.

"In the world of community health centers, you have to be able to look at your financials in a very dynamic way in order to both meet compliance requirements and actively manage operations. From my own experience, as well as every other CFO I've asked, there's no financial system better than Sage Intacct when it comes to analyzing data across multiple dimensions."

~ Lora Winchell, CFO, Hunter Health
