Sage Intacct Cloud Accounting Software for Zoos and Aquariums

The #1 cloud accounting solution helping nonprofits strengthen stewardship, build influence, grow funding, and achieve mission success.

We're passionate about building nonprofit accounting software that helps you navigate the complexity and demands of nonprofit financial management. Zoos and aquariums face unique challenges: from compliance reporting to generating outcome metrics and providing real-time visibility—we want you to spend less time on administrative tasks and more time on what really matters—advancing your mission.

Built for nonprofits

As your organization grows, manual processes drain your productivity and it's difficult to analyze your growing range of data. While you're managing multiple donors and funding sources, increased demand for services, and changing regulatory requirements, we've built our nonprofit accounting software with you in mind. Sage Intacct nonprofit customers have experienced efficiency gains up to 60% and dedicate more time to strategic decision making.

We provide intuitive core fund accounting with a dimensional general ledger and accounts payable automation, comprehensive grant tracking and billing, automated revenue recognition, easy-to-use reporting and dashboards, and a rock-solid audit trail.

Real-time visibility and insights

Zoos and aquariums need visibility into financial and operational metrics to make more informed decisions about programs, fundraising, staffing, and more. The Sage Intacct real-time reporting allows you to measure performance for financial, operational, and outcome metrics. Every transaction in the system is tagged with dimensions, so finance teams can sort, view, filter, and report on the specific information they need.

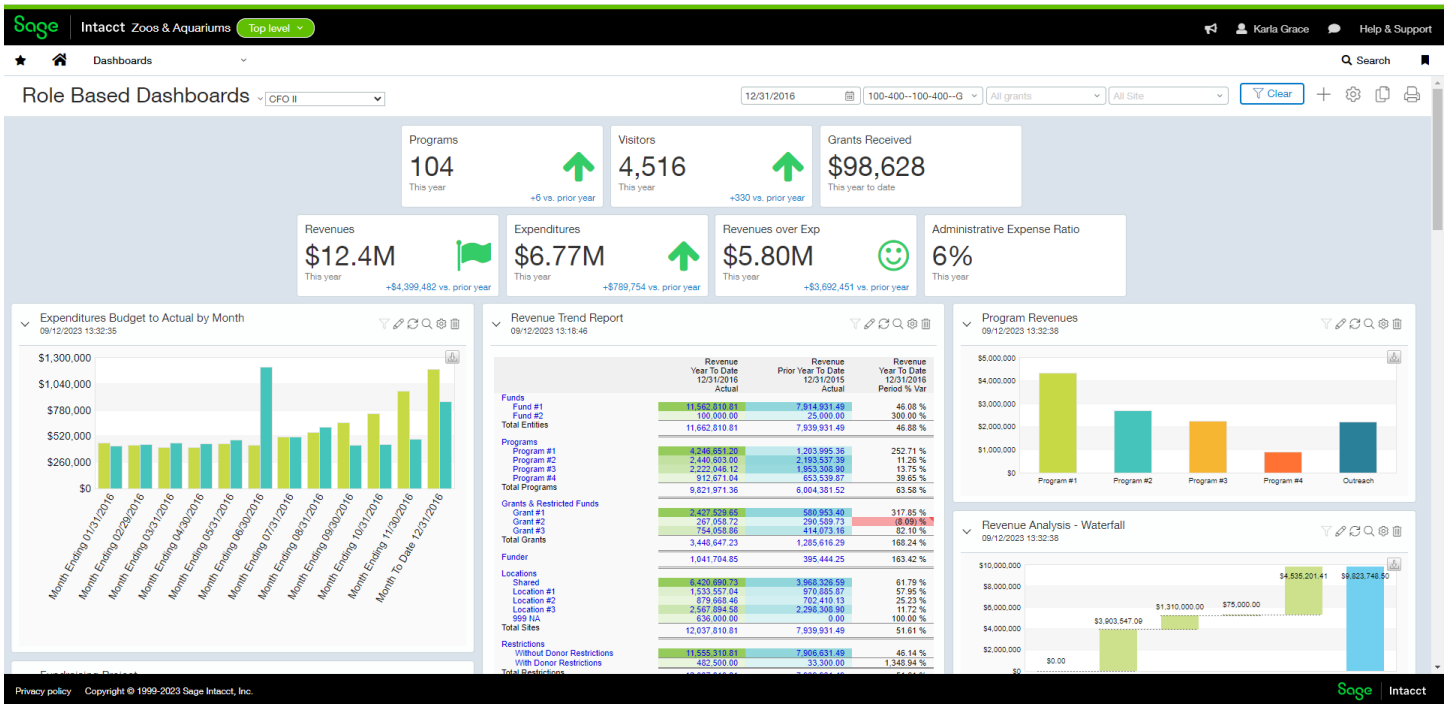

True cloud technology with open API

As an innovator in the cloud space, Sage Intacct has honed a true cloud model. Sage Intacct was built to deliver multi-tenant financial management, on a platform purpose-built for finance. This allows all users to be on the same version, without complicated and expensive upgrades. Our open API lets you connect to existing or future systems. This means you can leverage key data from donor management, payroll, budgeting, CRMs like Salesforce, and others to track metrics that are central to your organization's operations and programs.

Recognized by finance experts

- **AICPA**: Sage Intacct is the AICPA's first and only preferred provider of financial applications.
- **G2**: Sage Intacct has the highest customer satisfaction score for multiple accounting categories on G2, a leading business software review platform.

“In addition to the tremendous value of Sage Intacct’s dashboards and dimensions, it’s a great advantage to bring statistical information into the system so easily. We monitor daily attendance from our members and the general public and love that we can now marry the zoo’s financial information with these numbers. As a result, we can react quickly versus waiting until month-end to see if attendance makeup, food sales per capita, or other trends are out of their normal range.”

~ Frank Fieseler, CFO & COO, Brevard Zoo
